

- You are passionate about robotics, UAV and drones?
- You pursuing a bachelor or master degree in engineering?
- You are interested in a long-term job training besides University?

Technical Follow (technische Hilfskraft) in Engineering – Part Time

UMS Skeldar AG, a joint venture between Swiss based UMS Aero AG and Sweden based Saab AB, is a leading international high-tech company specialized in design, development, production and distribution of innovative technologies for our rotorcraft UAVs or RPAS-Remotely Piloted Air Systems.

Our Swiss-based office is seeking a technical follow to support the Engineering Team / Design Organisation for our Headquarters in Möhlin, Switzerland. The job placement is part time with a minimum duration of 9 months, whereas a long-term working relationship is desired.

Your responsibilities:

- Support the design team with technical documentation for
 - electrical systems and installations
 - harness and wiring diagrams
 - the overall system architecture
 - configuration management

Your qualifications:

- Experience through lab research, project teams, prior internship or work experience
- Strong interpersonal skills and ability to work effectively in a team environment, accomplishing tasks with limited resources on your own
- Student in engineering, electrical engineering or computer science in senior year preferred
- Intermediate skill level using Windows Operations Systems, Microsoft Office (Word, Excel, PowerPoint, Outlook)
- Good English language skills (verbal and in writing), a basic knowledge of German is an advantage
- We are looking for a reliable, accurate, communicative and team-minded member of our team, who works independently and has good analytical working skills

Interested?

We are looking forward hearing from you.
