

Remote Pilot, Flight Operations Team

Key words: UAV, RPAS, Pilot,

Join our Flight Operations Team during an exciting company growth phase to accelerate our products, in the development and production of the global drone market. You will be part of a team that values creativity, collaboration and new solutions. Take the exciting and challenging opportunity and join this journey that goes from development, production all the way to customer deliveries and support.

Your responsibilities:

- Supervision and execution of UAS operations as Pilot in Command
- Perform Flight Planning, Site Survey and Risk Analysis for UAS operation to applicable standards
- Develop and execute flight test plans and procedures in support of systems under test or customer demonstrations

Your qualifications:

Essential

- Experience in UAV's Operations and Control
- At least 5 years aviation experience, related subjects (ATC/Flight Planning/Met/Air Law/Navigation/Human Factors/Emergency Procedures etc)
- Perform root cause analysis and implement corrective actions to resolve issues
- Ability to problem solve, think "outside the box" and amicably resolve conflicts
- Ability to be proactive, take initiative and accept accountability for assigned work functions
- Ability to compile and interpret documents such as safety rules, operating and maintenance instructions, and procedure manuals
- Good communication and presentation skills
- Good English language skills, both verbal and in writing
- Good team player skills, self-driven attitude and the ability to aggressively work to fixed deadlines

Desirable

- Experience in Flight Trials and Testing
- Experience working in a related field as part of a multidisciplinary team preferred
- Autonomous flight planning experience
- Willing to put in the effort and hard work to make the details actually happen

Our offer:

- We offer a position in a development driven team with strong focus on results, working in the fast-emerging industry of unmanned technologies
- Close working relationships with other departments from a variety of disciplines
- Unique opportunity to see your work from your first input, to production all the way through to the customer

Location / General:

- Work full time at our Swiss facility in Möhlin (near Basel), Switzerland
- Deployments to our Swedish site and customer sites as required on an ad-hoc basis
- Start immediately, considering possible notice.

Company Profile

UMS Skeldar AG, a joint venture between Swiss based UMS Aero AG and Sweden based Saab AB, is a leading international high-tech company specialized in design, development, production and distribution of innovative technologies for our rotorcraft UAVs or RPAS-Remotely Piloted Air Systems.
