

## System engineering position with focus on testing

**Key words: UAV, RPAS, Robotics, System Engineering, Software Engineering**

UMS Skeldar AG, a joint venture between Swiss based UMS Aero AG and Sweden based Saab AB, is a leading international high-tech company specialized in design, development, production and distribution of innovative technologies for rotorcraft Unmanned Aerial Vehicles (UAVs) or Remotely Piloted Air Systems (RPAS).

Join us and become part of our engineering team; We offer a key position in a dynamic, technology driven company focused on design, production and operations of rotorcraft UAV, with focus on avionics, electronic and mechanical systems. Our Swiss-based office is seeking a system engineer to support the Engineering Team / Design Organisation. The job placement is full time in Möhlin, Switzerland.

### Your responsibilities:

- System engineer responsible for planning, executing and reporting on tests based on engineering and regulatory requirements for unmanned helicopters
- Assuring compliance with the most current test procedures and functional requirements
- Strong involvement in troubleshooting to support project related development tasks throughout the entire development process from design, production all the way to flight testing
- Technical project management in the role as system engineer, including coordination of the project activities and processes with other project members

### Your qualifications:

- University degree in engineering
- Minimum experience required is 2 years of technical work
- Background in software engineering
- General technical background
- Experience in managing development projects through the product life cycle is desirable
- Knowledge of aviation standards and certification processes is desirable
- Good English language skills, both verbal and in writing, a working knowledge of German language will be an advantage
- Good team player skills, self-driven attitude and the ability to work to fixed deadlines
- Flexible and strong "Hands on" mentality

### Our offer:

- We offer a position in a development driven team, working in the fast-emerging industry of unmanned technologies
- Close working relationships with the other departments from a variety of disciplines
- Unique opportunity to see your work from your first input all the way through to the final component and follow the product throughout its evolution

### Location:

- Work full time at our Swiss facility in Möhlin, Switzerland

**Interested? – Please contact us, we are looking forward hearing from you soon!**
